Subject:	DRS Withdrawal by Transfer Transaction Processing & DRS Centralized Billing and Legacy Withdrawal by Transfer Scope

DRS Withdrawal by Transfer Transaction Processing

On November 12, 2025, through Important Notice B#23199-25, The Depository Trust Company ("DTC") announced the user roles and entitlements for DRS Withdrawal by Transfer on the Securities Processing Application ("SPA") system. This change, which includes the automation of centralized billing for Transfer Agent pass-through fees on the SPA system, is part of DTC's multi-year, multi-phase Securities Processing Transformation Program.

The transformation of the DRS system, pending regulatory approval, progresses through a phased rollout of component functionalities at scheduled intervals.

DRS Profile Deposits, DRS Withdrawal by Transfer and DRS Centralized Billing will transition to the SPA system on November 13, 2026.

DRS Centralized Billing

DRS Reject Centralized Billing is being expanded to include centralized billing for DRS Profile Deposits and DRS Withdrawal by Transfer transactions and will become a mandatory service on the SPA system.

Legacy Withdrawal by Transfer Scope

The following Withdrawal by Transfer activities will continue to be processed on PBS via the Auto Night Withdrawal by Transfer function and the CF2WTC/WTM transaction input file. DMADEX and STSWTO will continue with transaction output (see below for full descriptions of these files).

- Certificated Withdrawals (e.g.; DRS Eligible non-Participating certificate only issues)
- Withdrawals of certain DTC-eligible securities by foreign national investors (includes communications, aviation and maritime issues).

DTCC offers enhanced access to all important notices via a Web-based subscription service. The notification system leverages RSS Newsfeeds, providing significant benefits including real-time updates and customizable delivery. How it works

The DRS Eligible Indicator contained in each DTC eligible CUSIPs master record as set by DTC will be used as the gatekeeper for Withdrawal by Transfer transactions to route and process through PBS and SPA.

For automated transaction processing firms can find the DRS Eligible Indicator on the ELISC/ELISCD Eligible Corporate Securities/Eligible Corporate Securities with Descriptions data file (Position 44, Length 1, Format Character, Field Name, Field Description "N" = Non-Eligible for DRS, "Y" = DRS Issue). Firms may use the DRS Eligible Indicator to direct transactions to PBS or SPA as applicable.

All certificated issues (non-DRS Eligible securities) with the DRS Eligible Indicator set to "N" will be rejected upfront when entered in SPA via the SPA portal or API/MQ connectivity. The system will return a message indicating "DRS eligible issue not participating" or "CUSIP is not DRS Eligible". These rejects will need to be resubmitted to PBS or the CCF file CF2WTC/WTM.

All DRS Eligible issues with the DRS Eligible Indicator set to "Y" will be rejected upfront when entered in PBS via the Auto Withdrawal by Transfer function and the CCF file CF2WTC/WTM. The system will return a message indicating "DRS Issue Should be Entered via SPA Portal" or error code "H", "Invalid or Missing DRS Info" via file. These rejects will need to be resubmitted to SPA.

Firms instructing Withdrawal by Transfer of U.S. Securities with Restrictions on Foreign Ownership (for foreign national investors) are required to attest to citizenship and should direct these transactions to PBS or the CF2WTC/WTM file.

CCF File Descriptions

- Auto Withdrawal by Transfer input CF2WTC/WTM– allows Participants to create Withdrawal by Transfer transactions through automation. This file will continue to support physical certificated Withdrawal by Transfer transactions for the foreseeable future (DRS Withdrawal by Transfer transactions will move to SPA via the DRS Withdrawal by Transfer API or MQ).

- DMA/DMD Out Transfer DMADEX – allows Participants to receive updates on Withdrawal by Transfer transactions through automation. This file will continue to support physical certificated Withdrawal by Transfer transactions for the foreseeable future (DRS Withdrawal by Transfer transactions will move to SPA via the DRS Withdrawal by Transfer API or MQ).

- Out Transfer Detail Activity STSWTO – allows Participants to receive updates of Withdrawal by Transfer transactions through automation. This file will continue to support physical certificated Withdrawal by Transfer transactions for the foreseeable future (DRS Withdrawal by Transfer transactions will move to SPA via the DRS Withdrawal by Transfer API or MQ).

This change will be effective on November 13, 2026.
