Subject:	INSURANCE & RETIREMENT SOLUTIONS - DECOMMISSIONING SOAP-BASED XML SERVICES

To provide clients with a more secure, resilient, and scalable integration model while simplifying ongoing development and maintenance DTCC's Insurance & Retirement Solutions (I&RS) plans to decommission SOAP-Based XML services in 2027. This is sooner than originally anticipated to strengthen the security offered for these message types, reduce reliance on end-of-life technology and advance our modernization efforts.

Clients using these SOAP-based XML services below should begin migrating to the corresponding REST/JSON services and complete testing and implementation before **Thursday, November 18, 2027**.

- **Attachments**
- **IFT Web Services:** Withdrawals, Arrangements, Fund Transfers, Values Inquiry, Policy Administration, Policy Inquiry, and Death Notification

Client action and service availability
REST/JSON alternatives are either available today or planned before decommissioning. Clients should identify affected integrations, confirm replacement services, assess connectivity, security, and testing impacts, assign accountable business and technology owners, and allow sufficient time for PSE testing and production deployment. DTCC will communicate service-specific readiness and implementation guidance as milestones are confirmed.

Operational impact: After November 18, 2027, the affected SOAP-based XML services will no longer be available. Clients that have not completed migration may experience disruption to related business processes.

Support: For implementation support, submit a case through MyDTCC or Contact Us and include the affected service, anticipated timeline, and business and technical contacts.
